

## CARE GUIDE

- In some areas water contains high levels of chemicals. This leads to staining of the surface. Dry the resurfaced area after use.
- Poor drainage can trap water around the drain outlet. This can cause rust. Please keep your resurfaced area dry. Wipe down with a soft cloth after use.
- If you drop a heavy item on your resurfaced area—like a hand held shower or a loose tap handle or any tools—it will chip the surface..
- If you use a rubber mat in your bath—please remove it after bathing. If left, it will damage your bath..
- Do not use hair dye's, nail varnish remover in the resurfaced area. It will stain the area irrecoverably.
- Do not leave Lifebuoy soap or any soap for that matter on the resurfaced area. Colourants and additives in the soaps stain the resurfaced area.
- Do not leave washing soaking in the bath. The detergent, when left to soak—damages the resurfaced area. Dye's in your clothing may stain the resurfaced area..
- Do not leave foreign objects—like bucket's and basin's in the bath. It may scratch the resurfaced area.
